

# Google Pay Overview

Last Modified on 07/21/2023 12:51 pm PDT

Qualpay can process Google Pay transactions via the Payment Gateway API and Qualpay Checkout. Please visit the Qualpay Developer Portal for information on implementing [Google Pay with the Payment Gateway API](#). To enable Google Pay for Qualpay Checkout, please review the [configuration guide for Qualpay Checkout](#). When you've enabled Google Pay on Qualpay Checkout, an "Express Checkout" button will appear next to the standard checkout option.

If Google Pay is selected, your customer will see a list of payment cards stored in their Google Wallet to be used for payment. Google Pay transactions will process with your Qualpay account and can be [viewed in Qualpay Manager](#).
